

## Allen Co Energy Meeting Notes 2/5/2020

Note. There's a new tracking document with follow-up items generated during the meetings.

### Updates

#### CalGem

- Conducts ongoing weekly inspections. 12/13 there was a leak, which was repaired. Next inspection is 2/6.
- The Sept. order to the Director's Office of Appeals was upheld. Allenco's plan for well-kill operations is due 2/20, otherwise, they can seek Superior Court review.

#### AQMD

- Data on 10/18 air monitor was sent to community stakeholders. Staff will follow up with the records department to assess remaining records that need to be shared with community stakeholders to fulfill the Public Records Request.
- On 10/18/19 they received 1 odor complaint. Odor was described as not like oil. No odor detected by inspector. On 12/30/19 received an odor complaint that alleged AllenCo Energy was using a deodorizer with an orange scent that was causing headaches. AQMD inspected it and didn't detect the smell or see a deodorizer.
- On 1/15 moved the air sampler to the NE corner of AllenCo Energy to be in a more downstream location.

#### Community Stakeholders

- A frequent challenge is delays in receiving information from agencies
- A frequent challenge is having information available in regular, everyday language from agencies. For example, air monitoring data is provided as a lab report that is nearly impossible for a community member to interpret.
- Community would like a chemical records list as far back as records go. (CUPA will check their available records.)

#### LA City Attorney

- Fire shared the legal packet with the City Attorney's office. The documents are under review.

#### Fire

- AllenCo Energy was inspected on 9/19 with 3 minor deficiencies found. On 10/28/19 the chemical inventory on CERS only listed crude oil.
- Fire will send out safety data sheets for previously listed chemicals.

#### LA Petroleum Administrator

- AllenCo Energy filed a claim against the City.
